

## HASA GYSAR 'S' TILE BRITE

**GYSAR 'S'** can be used for routine swimming pool tile maintenance. It's primary usage, however, is to cut surface tension of the pool water so that it is easier to collect surface debris and to see the pool bottom and sides, for vacuuming.

### **DIRECTIONS FOR USE:**

When **GYSAR 'S'** is squirted down the middle of the surface of the pool, its action will herd debris to the outside perimeter of the pool. When **GYSAR 'S'** squirted around the outside perimeter of the pool, it will move the dust and debris to the center of the pool.

Each of these applications, down the middle or around the perimeter, will make surface skimming more efficient saving you valuable time. **GYSAR 'S'** can be dispensed by using either a spray container or a single-spout squeezable plastic bottle.

### **AVAILABLE PACKAGING:**

**GYSAR 'S'** is sold in an economical one gallon container for the pool service professional.
