

CALCIUM CHLORIDE (LIQUID)
INCREASES POOL AND SPA WATER HARDNESS
Accelerates curing of pool plastic

CALCIUM CHLORIDE (LIQUID) is used to increase the calcium hardness of pool and spa water. Plaster pool surfaces may etch if calcium hardness is below 175 ppm. Test the water with a reliable test kit. Acceptable calcium hardness is within a 175-275 ppm range.

DIRECTIONS FOR USE:

One gallon **LIQUID CALCIUM CHLORIDE** is approximately equal to 5 pounds of dry (80% active) calcium chloride.

AVAILABLE PACKAGING:

LIQUID CALCIUM CHLORIDE is available in one gallon containers.
